

DANIEL MALDONADO ARIAS

AI Engineer | LLM Applications, Agentic Automation & Cloud Deployment | English
Medellin, Colombia (Remote - US time zones) | damarias991@gmail.com | +57 304 520 18 70 | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

AI Engineer building production large language model (LLM) applications for Transportation & Logistics finance operations. Owns the full lifecycle - architecture, development, testing, deployment - of agentic automations on Anthropic Claude and OpenAI, orchestrated in n8n and deployed on Amazon Web Services (AWS). Raised automation capture from 7% to 82% on a document-matching pipeline, cut per-document processing time by 98%, and sustained 100% production availability. Led AI security for the team, hardening every system component & pipeline against internal & external threats, prompt-injection and data-exposure risk. CompTIA Security+ certified.

TECHNICAL SKILLS

Languages & Core: Python, SQL, Git / GitHub

Foundation Models: Anthropic Claude (Opus, Sonnet, Haiku), OpenAI GPT, multi-provider routing, model selection by cost/latency

LLM Application: Prompt engineering (few-shot, chain-of-thought), structured outputs (JSON Schema), prompt versioning

Agents & Tool Use: Tool calling / function calling, Model Context Protocol (MCP), multi-step orchestration, retry-bounded loops, human-in-the-loop review

Orchestration: n8n (self-hosted, AI nodes), event-driven pipelines, webhooks, REST API integration

Evaluation & Observability: Langfuse (tracing, prompt management), execution KPI instrumentation, reliability monitoring

Document AI: Optical Character Recognition (OCR) pipelines, ReformHQ, structured field parsing, validation rules engines

Cloud & Data: AWS (ECS, ECR, Lambda, S3, IAM), Docker, Supabase / PostgreSQL, CI/CD

Security & Governance: AI pipeline hardening, prompt-injection defenses, secrets/IAM management, least-privilege access, audit logging

PROFESSIONAL EXPERIENCE

AI Engineer | Lean Solutions Group (Contract)

Mar 2025 - Aug 2026 | Remote - Medellin, Colombia

Owned end-to-end delivery of production LLM automations for the Accounts Payable / Accounts Receivable (AP/AR) function of US freight brokerage clients.

- Built the matching logic of a Proof-of-Delivery (POD) document agent, lifting **automation capture rate from 7% to 82%** across 350 weekly executions by redesigning extraction rules, validation gates, and human-in-the-loop escalation paths.
- Shipped an invoice reconciliation agent combining OCR extraction with GPT-based structured output, cutting per-invoice processing from **2.5 minutes to 30 seconds (80% reduction)** and clearing ~65% of invoices autonomously - approximately 7 hours of manual finance work removed weekly.
- Held the production pipeline at **100% availability with zero failed incidents** while running at 104% of target weekly throughput (250 shipments), instrumented with Langfuse tracing and a weekly reliability KPI report delivered to the client.
- Architected the self-hosted AI environment on AWS (ECS, ECR, Lambda, S3, IAM) with Docker and n8n, giving clients deployability, scalability, and data residency control instead of a third-party SaaS dependency.
- **Led AI security for the team:** least-privilege IAM, secrets management, prompt-injection defenses, and audit logging; caught a silent third-party API schema change before it corrupted downstream finance data and added contract-validation checks to make that failure class auto-detectable.

Business Intelligence Analyst | Independent Short-Term Rental Operation

Sep 2022 - Nov 2023 | Medellin, Colombia

- Built ETL and data-visualization workflows to optimize pricing across peak tourism seasons, sustaining a **90% booking rate and 4.8/5.0 guest satisfaction** score.
- Ran market and competitive analysis that shaped the listing strategy and paid-ads plan, and managed the full international guest communication lifecycle.

Data Analyst | Bioma Organics S.A.S.

Sep 2021 - Jun 2023 | Medellin, Colombia

- Designed and implemented the company database and CRM practices, scaling the B2B customer portfolio to **120 pet stores and spas**.
- Delivered the data-driven sales strategy that captured **15% of the regional pet-spa market** across 10 cities in Antioquia.

PROJECTS

AI Colombia - AI engineering project for the LATAM market; publishes applied LLM and automation content and runs in top of knowledge sharing and frontier technology principles.

EDUCATION & CERTIFICATIONS

CompTIA Security+ (SY0-701) - passed 2026

Google Prompt Essentials – passed 2026

Sound Engineering degree | Universidad de San Buenaventura, Medellin, 2012-2017
